

Class 5 Mrs Morgan

ENGLISH: We continue our quest story- we're half way through now and things are becoming tense and dangerous for the heroes. Through the writing I am teaching the grammar and spelling required by the National Curriculum as well as offering plenty of reading opportunities. I am including lots of opportunities to practice SAT style questions too.

MATHS: This term begins with measure and data though revision of division, long multiplication, fractions, percentages and ratio and proportion will be high on the agenda too.

ART: Aboriginal art model making and bark painting will resume after science week when we are using graffiti and words to develop our ideas about the sea.

SCIENCE: During science week we were lucky enough to have a parent who is a scientist and geographer, Dr Mills, talk to the class about renewable energy and the importance of being able to accurately map the sea bed. Mrs Cuthill will continue to teach Science on Friday mornings, studying Rocks & Fossils in addition to States of Matter, including the Water Cycle.

HUMANITIES: Linked to last term's World War 2 learning, we will have an RE focus this term, focused on Judaism. Mrs Harrison will be leading this, exploring Judaism and the Seder feast at Passover.

PE: Premier sport will be teaching invasion games.

French and Music continue to be delivered by specialist teachers, Mrs O'Malley and the Norfolk Music Service.
